

Professor Hans J. Stauss is the Head of Clinical Immunology at the Royal Free Hospital, as well as the Head of the UCL Research Department of Immunology and co-Director of the UCL Division of Immunity and Transplantation. He is also the Director of the Infection, Immunology and Inflammation program of the Academic Health Science Centre of UCLP.

Previously he was the Head of the Tumour Immunology section at Hammersmith Hospital. He studied for his Doctor of Medicine (MD) in 1982 at the University of Freiburg and went on to do his PhD at the University of Chicago in 1987. He is a fellow of the Royal College of Pathologists (FRCPath) since 2007.

The main focus of his work is the analysis of antigen-specific T lymphocyte responses to tumours and the development of immunotherapy approaches for the treatment of cancer and chronic infection. In order to facilitate the development of immunotherapy, he led the development of the new UCL Institute of Immunity and Transplantation, which will focus on new vaccines, and on innovative cell and gene therapy approaches for the treatment of viral infection, cancer and other diseases.
