

Short Bio

Peggy Sotiropoulou joined Celyad in 2017. As Director of the R&D department, she leads a broad-ranging research program that aims to develop new strategies in CAR T cell design to target haematological and solid malignancies. Prior to Celyad, Peggy spent 17 years in Academic research in oncology and immunology. Before moving to industry, Peggy was associate Professor in the Université Libre de Bruxelles, in Brussels, Belgium, leading research in fundamental oncology and publishing landmark papers in top tier scientific journals. The aim of Peggy in Celyad is to translate cutting-edge research and innovation into actual treatments for patients.
